

Information retrieval from RIKSWEB:

By clicking the Search button you can search publications by the author, co-author, title, subject and words in text.

“Type” enables to refine the search by the type of the publication: books, journals, diploma theses etc. If you do not specify the type of the publication, the results may contain all types of publications.

“Language” enables search by language.

“Library” enables to search publications from the Tallinn Health Care College Library, the Library of the Kohtla-Järve structural unit or from both.

Search by the author:

enables to search by the author, compiler, editor, supervisor.

Select **AUTHOR** and fill in the search field **TEXT TO SEARCH** with the last name (and the first name) of the author.

The screenshot shows a search interface with the following elements:

- Checkboxes for "Nimetused" (checked) and "Üksikosad" (unchecked).
- Fields for "Keel" and "Ühik" with dropdown arrows.
- A "Kogu" section with a dropdown menu set to "Kõik kogud".
- A "Vali mida otsida" section with a dropdown menu. The "Autor" option is highlighted in blue. Other options include "Vabasõna", "Märksõna", "Pealkiri", "Teised autorid", "Sarjaandmed", "Liik(UDK)", and "ISBN/ISSN".
- An "Otsitav tekst" field containing the text "Zilmer, Mihkel".

Two arrows from the text above point to the "Autor" option in the dropdown menu and the search text field.

The results will give a list of publications by the given author in our library.
